

LO: Can I recognise multiples of two and count in twos, forwards and backwards? Can I recognize odd and even numbers?

Wb 1.3.21

1. Use the numicon to count up in steps of 2.

2. Use the number line to jump in steps of 2.

3. Fill in the missing numbers to count up in 2s.

0	2		6		10	12			
---	---	--	---	--	----	----	--	--	--

4. Circle whether these numbers are *even* or *odd*.

<p>2</p> <p>Even</p> <p>Odd</p>	<p>4</p> <p>Even</p> <p>Odd</p>	<p>6</p> <p>Even</p> <p>Odd</p>	<p>8</p> <p>Even</p> <p>Odd</p>
<p>12</p> <p>Even</p> <p>Odd</p>	<p>15</p> <p>Even</p> <p>Odd</p>	<p>18</p> <p>Even</p> <p>Odd</p>	<p>14</p> <p>Even</p> <p>Odd</p>

Are numbers in this two's pattern odd or even? How do you know?
